

**Exhibition of
Drawings
Graphics
& Watercolours**

ARTISTS ASSOCIATION OF PUNJAB

The Artists Association of the Punjab is a representative organization of the artists of Punjab and is affiliated with similar organizations from Sind, Baluchistan and N.W.F.P. The exhibition of drawings, pastels, water colours and graphics marks the commencement of the third year of existence of the Association. The A.A.P. is adhering to its policy of bringing to the viewers only fresh works of member artists which have not been exhibited before.

A pencil, pastel, crayon or water colour is a useful medium to observe and record one's immediate reactions. The brief and instant response to people and objects enables an artist to enrich his repertoire of forms, tones, colours, images and ideas.

Drawings, water colours or pastels can be studied and elaborate, but generally speaking, they are more candid and spontaneous in spirit, often reflecting intimate moments and casual perceptions of an artist. Naturally the works of artists who fumble with their medium are awkward.

Sometimes the virtue in spontaneity and brevity of a drawing is overstated. Often works realised with minimum of efforts are greatly idealised and a preliminary study is presented as a finished work of art. The great masters who made series of studies for their paintings never presented them as finished works. However in modern times drawings, water colours, pastels and graphics have developed and acquired a valid independent form of expression. They can be quite elaborate and as complete as possible, several examples of which can be seen in the present display.
